

Membuat fungsi tambah blog

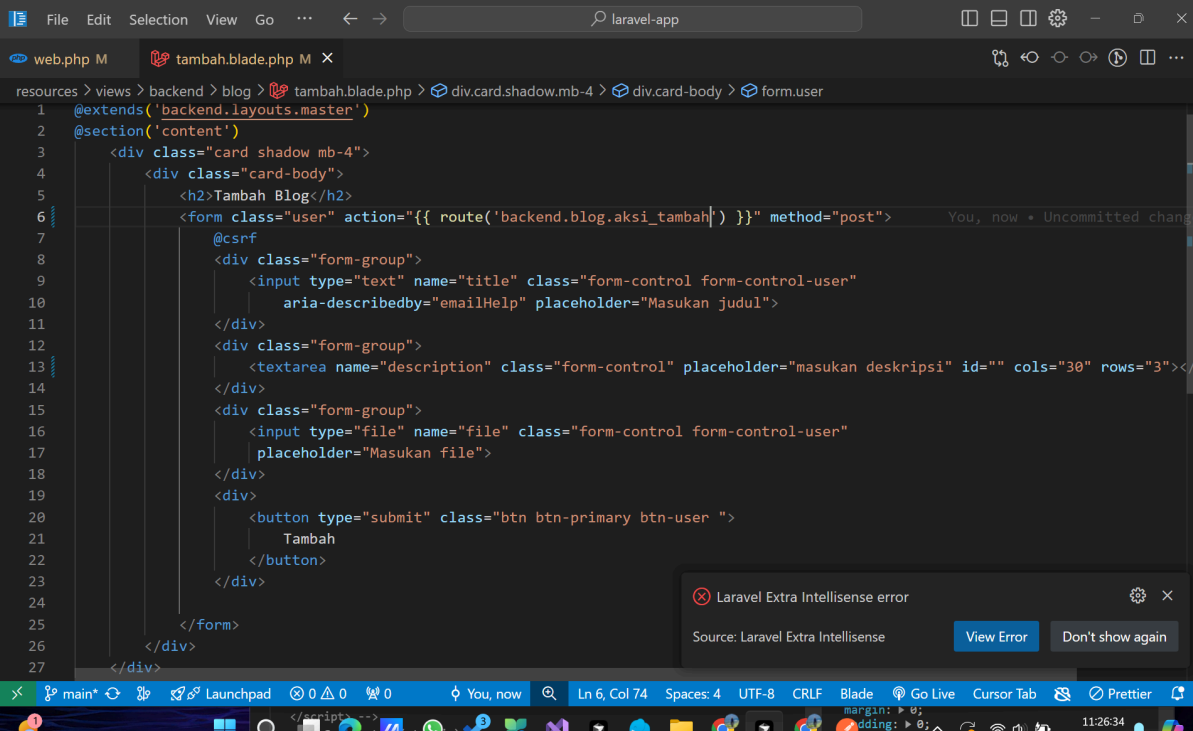

buat route **aksi_tambah** untuk menambahkan data blog seperti ini

```
routes > web.php > Closure
20 |
21 | */
22 |
23 | Route::get('/', [HomeController::class, 'index'])->name('home');
24 |
25 | Route::get('/blog', [BlogController::class, 'index'])->name('blog');
26 | Route::get('/blog/detail/{slug}',
27 | [BlogController::class, 'detail'])
28 | ->name('blog_detail');
29 |
30 |
31 | // backend
32 | Route::get('/login', [LoginController::class, 'index'])->name('login');
33 | Route::post('/aksi_login', [LoginController::class, 'aksi_login'])->name('aksi_login');
34 |
35 | Route::middleware(['AuthWeb'])->group(function () {
36 |     Route::get('backend/blog', [BackendBlogController::class, 'index'])->name('backend.blog');
37 |     Route::get('backend/blog/tambah', [BackendBlogController::class, 'tambah'])->name('backend.blog.tambah');
38 |     Route::post('backend/blog/aksi_tambah', [BackendBlogController::class, 'aksi_tambah'])->name('backend.blog.aksi_tambah');
39 |
40 |     Route::get('backend/slider', [SliderController::class, 'index'])->name('backend.slider');
41 |     Route::get('backend/service', [ServiceController::class, 'index'])->name('backend.service');
42 | });
43 |
```

Laravel Extra Intellisense error

View Error
Don't show again

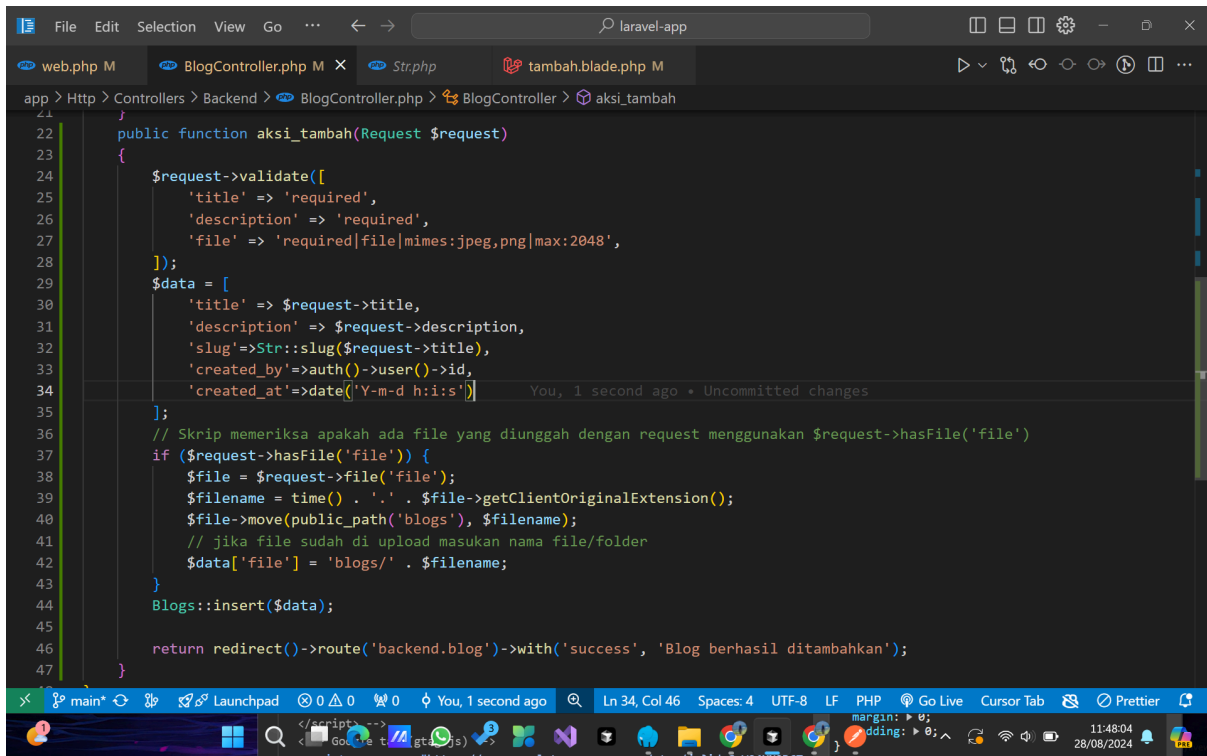

lalu ubah action form tambah ke **aksi_tambah** dan tambah kan attribute **enctype="multipart/form-data"**

```
resources > views > backend > blog > tambah.blade.php > div.card.shadow.mb-4 > div.card-body > form.user
1 | @extends('backend.layouts.master')
2 | @section('content')
3 |     <div class="card shadow mb-4">
4 |         <div class="card-body">
5 |             <h2>Tambah Blog</h2>
6 |             <form class="user" action="{{ route('backend.blog.aksi_tambah') }}" method="post">
7 |                 @csrf
8 |                 <div class="form-group">
9 |                     <input type="text" name="title" class="form-control form-control-user"
10 |                        aria-describedby="emailHelp" placeholder="Masukan judul">
11 |                 </div>
12 |                 <div class="form-group">
13 |                     <textarea name="description" class="form-control" placeholder="masukan deskripsi" id="" cols="30" rows="3"></t
14 |                 </div>
15 |                 <div class="form-group">
16 |                     <input type="file" name="file" class="form-control form-control-user"
17 |                        placeholder="Masukan file">
18 |                 </div>
19 |                 <div>
20 |                     <button type="submit" class="btn btn-primary btn-user ">
21 |                         Tambah
22 |                     </button>
23 |                 </div>
24 |             </form>
25 |         </div>
26 |     </div>
27 | </div>
```

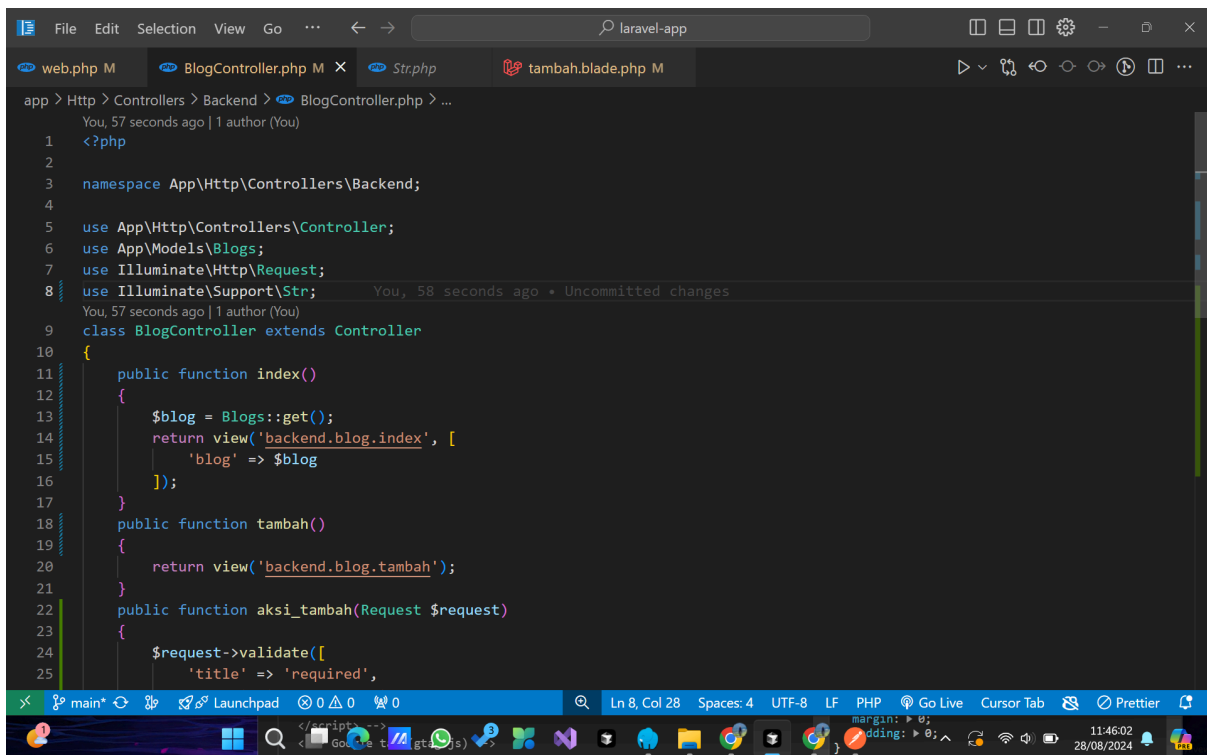

Laravel Extra Intellisense error
Source: Laravel Extra Intellisense
View Error
Don't show again

lalu buat fungsi **aksi_tambah** seperti ini

```
22 public function aksi_tambah(Request $request)
23 {
24     $request->validate([
25         'title' => 'required',
26         'description' => 'required',
27         'file' => 'required|file|mimes:jpeg,png|max:2048',
28     ]);
29     $data = [
30         'title' => $request->title,
31         'description' => $request->description,
32         'slug' => Str::slug($request->title),
33         'created_by' => auth()->user()->id,
34         'created_at' => date('Y-m-d h:i:s')
35     ];
36     // Skrip memeriksa apakah ada file yang diunggah dengan request menggunakan $request->hasFile('file')
37     if ($request->hasFile('file')) {
38         $file = $request->file('file');
39         $filename = time() . '.' . $file->getClientOriginalExtension();
40         $file->move(public_path('blogs'), $filename);
41         // jika file sudah di upload masukan nama file/folder
42         $data['file'] = 'blogs/' . $filename;
43     }
44     Blogs::insert($data);
45
46     return redirect()->route('backend.blog')->with('success', 'Blog berhasil ditambahkan');
47 }
```

dan juga jangan lupa use `Illuminate\Support\Str`; seperti ini

```
1 <?php
2
3 namespace App\Http\Controllers\Backend;
4
5 use App\Http\Controllers\Controller;
6 use App\Models\Blogs;
7 use Illuminate\Http\Request;
8 use Illuminate\Support\Str;
9
10 class BlogController extends Controller
11 {
12     public function index()
13     {
14         $blog = Blogs::get();
15         return view('backend.blog.index', [
16             'blog' => $blog
17         ]);
18     }
19     public function tambah()
20     {
21         return view('backend.blog.tambah');
22     }
23     public function aksi_tambah(Request $request)
24     {
25         $request->validate([
26             'title' => 'required',
```
